| OptiGrid Holdings Pty Ltd | Software for managing Battery Energy Storage Systems (BESS) to maximise battery returns for operators and enhance grid stability | OptiGrid's software uses proprietary physics-informed, machine learning-based algorithms for electricity price forecasting to help grid-scale battery asset operators and owners optimise asset performance and increase energy arbitrage revenue opportunities, maximising battery economics and accelerating grid-scale renewable investment. The project supports the development and commercialisation of a fully scalable SaaS product for operating batteries and trading in electricity markets, adhering to regulations and technical constraints. | 23/06/2025         | 28/02/2026       | 489,0008      |
| DryFlow Magnetics Pty Ltd | An innovative dry magnetic separator for mineral processing                                                                      | DryFlow Magnetics is developing an innovative dry magnetic separator for efficient and waterless separation of target minerals with relatively low energy and infrastructure requirements. The project will complete a digital model to scale the design of the existing prototype and enable accurate costing ahead of the planned scaled prototype.                                                                                                                                                                                                      | 23/05/2025         | 28/02/2026       | 100,000       |
| Alyra Biotech Pty Ltd     | Optimisation of an intrauterine device to reduce pelvic pain in women                                                            | Alyra Biotech is developing and commercialising an immune-modulating intrauterine device (IUD) to reduce pelvic pain in women. Alyra has undertaken preclinical research and successful first-in-human Phase 1 clinical trial. The project will support optimisation of the intrauterine device for scaled up manufacturing and regulatory approval.                                                                                                                                                                                                       | 05/03/2025         | 31/03/2026       | 500,000       |
| CoilRig Pty Ltd           | Commercialisation of Coiled Tubing Drilling Rig for Geothermal                                                                   | CoilRig is developing a coiled tubed drilling rig enabling geothermal well drillers a cheaper, faster, and safer way to drill for installation of a vertical borehole ground heat pump. The project aims to undertake testing and validation activities for the rig including a field trial with a lead customer, as well as execute strategic market entry activities in international markets.                                                                                                                                                           | 12/12/2024         | 31/12/2026       | 450,000       |
| Spiral Data Group Pty Ltd | Transient Detect: Using machine learning algorithms to help monitor infrastructure for water networks                            | Transient Detect uses machine learning algorithms to identify pressure transient events for water utility customers to reduce infrastructure fatigue, water loss, and network disruption. The project is to complete field trials of a newly developed device which detects and transmits pressure transient events using a proprietary algorithm deployed on-device.                                                                                                                                                                                      | 8/11/2024          | 1/07/2025        | 66,000        |

| Org Name                    | Project Title                                                             | Project Description                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Funding Start Date | Funding End Date | Grant Funding |

| Outhire Pty Ltd             | Expanding US market reach and obtaining SOC 2 certification               | Outhire is an employer brand platform that leverages artificial intelligence to streamline the creation of targeted awareness campaigns and automate distribution across professional networks and social channels to attract quality potential employees. The project is to accelerate growth through US market entry activities and to undergo an audit process to meet industry standards for data protection and privacy.                                       | 1/11/2024          | 31/10/2025       | 93,394        |
| Miniprobes Pty Ltd          | Bringing an AI-driven meat quality probe to commercial release            | Miniprobes is commercialising unique fibre-optic imaging technology and artificial intelligence to deliver an innovative device for fast and objective measurement of red meat quality so that the global meat processing industry can better assess quality and achieve significant efficiency gains. The project will develop additional product differentiation, conduct trials with a lead customer, and complete industry accreditation ready for first sales. | 9/10/2024          | 31/05/2026       | 500,000       |
| Cropify                     | Export Market Validation                                                  | Cropify is solving a global pulses and grain supply chain challenge by utilising artificial intelligence and machine learning to eliminate subjective visual testing from the classification process. The funded project will help validate its product offering in a new export market with the supply chain and potential customers.                                                                                                                              | 18/09/2024         | 20/06/2025       | 60,000        |
| Paladin Space Pty Ltd       | Space Debris: Characterising and Capturing a Deadly Threat                | Paladin Space is developing an innovative satellite payload with a reusable method for identifying, capturing and removing destructive space debris. The project will develop artificial intelligence to enable the capture of space debris and trial the system prototype in a lab demonstration.                                                                                                                                                                  | 06/09/2024         | 30/09/2025       | 100,000       |
| Smartfem Pty Ltd            | Novel autologous graft for surgical intervention of pelvic organ prolapse | SmartFem is commercialising the 'VictOria Generation 1 kit', which produces an autologous graft to increase the success rate of standard native tissue repair in pelvic organ prolapse surgeries. The project includes obtaining regulatory approval, additional independent clinical evaluation and market entry activities.                                                                                                                                       | 8/07/2024          | 31/03/2027       | 500,000       |
| Cabot Knee Balancer Pty Ltd | Disposable knee balancing device for use in TKR surgery                   | Cabot Knee Balancer is developing a disposable intra-articular knee ligament balancing device and cutting guide to enable a surgeon to accurately balance the knee through the full range of movement during Total Knee Replacement surgery. Funding                                                                                                                                                                                                                | 20/06/2024         | 31/08/2025       | 400,000       |

| Sequential Pty Ltd            | Sequential platform for financial institutions                            | Sequential is a fintech start up developing a SAAS platform for automation and optimisation of trust management for financial institutions. The project                                                                                                                                                                                                                                                                                                             | 9/02/2024          | 28/02/2025       | 100,000       |
| Flux Robotics Pty Ltd (no. 2) | Accelerating Go-to-Market of High Precision Weeding Technology            | Flux is building an ecosystem of robotics products using machine learning to help farmers increase productivity by using less pesticide. The aim of this project is to accelerate customer adoption by quantifying the Return-On-Investment of it's high precision weeding technology.                                                                                                                                                                              | 20/12/2023         | 31/08/2025       | 500,000       |
| Frigid Solutions Pty Ltd      | Establish Frigid with foundation clients to quantify energy savings       | Frigid is a subscription-based temperature control system using IoT devices and cloud computing. The company will seek to conduct trials with 20 clients to quantify the positive impact the platform has on energy efficiency and cost savings.                                                                                                                                                                                                                    | 19/12/2023         | 30/12/2024       | 93,333        |
| Global Movement Pty Ltd       | Validating use of a Novel Shoulder Rehabilitation Device and Smart App    | Global Movement is a medical device company that has developed a physical device to assist in rehabilitation after shoulder surgery. The product combines a tangible asset with technology applications to improve clinical outcomes and user experience. The project will develop fully functioning devices, and a basic and easy to use smartphone application, for clinical trials to show the device is safe to use in the early stages after shoulder surgery. | 8/11/2023          | 1/10/2024        | 50,000        |
| Maxm Skate Pty Ltd            | MAXM Rehabilitation                                                       | MAXM has developed a digital healthcare solution and device to improve rehabilitation outcomes from knee surgery backed by research. The project will conduct a clinical trial in a public hospital setting.                                                                                                                                                                                                                                                        | 14/08/2023         | 15/06/2024       | 100,000       |
| ValAi Pty Ltd                 | Project Greenhouse                                                        | ValAi is a climate and fintech company commercialising Greenhouse - an automated sustainability rating tool and customer platform that provides personalised home insights. ValAi will deploy the Greenhouse technology for real-world trials with key customers. and develop customer use-case examples, testimonials and case study materials critical for commercialisation.                                                                                     | 5/06/2023          | 31/03/2024       | 98,726        |
| VAWT-X Energy Pty Ltd         | Verification of Advanced Vertical Axis Wind Turbine Technology Prototypes | VAWT-X Energy Pty Ltd is developing an innovative and more efficient blade design for Vertical Axis Wind Turbines (VAWT) to deliver the low cost and low environmental impact advantages of VAWT with the equivalent efficiency of Horizontal turbines that dominate the market. The project is                                                                                                                                                                     | 5/06/2023          | 31/05/2026       | 300,000       |

The project will refine the software platform, engage with the target market and assemble a team for an international expansion into the US across the sports and defence offering.                                                                                                                 | 20/04/2022         | 30/09/2023       | 500,000       |
| Ping Services Pty Ltd (Ping Monitor Device No. 2) | Development of continuous offshore wind turbine blade monitoring           | Ping Services has developed the Ping Monitor, a device that uses AI and acoustic monitoring to deliver accurate and cost-effective monitoring of wind turbine blades to help prevent catastrophic failure. This project will develop a continuous offshore wind turbine blade monitoring system to reduce the high offshore blade maintenance costs including development for the corrosive offshore environment. | 17/02/2022         | 1/12/2022        | 270,700       |
| ConsultX Pty Ltd ('Consultmed')                   | Consultmed – Digital integration and interoperability                      | Consultmed is a digital referral and workflow automation platform that directly connects primary healthcare providers (e.g. GPs) with specialist clinics and hospitals networks. The project will enable its software to become interoperable with GP and hospital electronic medical record systems (EMRs) and SA Health's preferred secure message delivery system (HealthLink).                                | 20/01/2022         | 31/12/2023       | 100,000       |

| Org Name                                  | Project Title                                                              | Project Description                                                                                                                                                                                                                                                                                                                                                                                              | Funding Start Date | Funding End Date | Grant Funding |

| Flux Robotics Pty Ltd (no. 1)             | Commercialising AI Weed Control on South Australian Vegetable Farms        | Flux is building an ecosystem of robotics products using machine learning to help farmers increase productivity by using less pesticide. The project will scale up the company's detect-and-spray system so it can operate with the speed and ruggedness required for first sales.                                                                                                                               | 23/12/2021         | 31/10/2022       | 100,000       |
| PrioriAnalytica Pty Ltd                   | Advanced Operational Analytics for Clean Energy & Logistics                | PrioriAnalytica has developed applications that predict early-onset failures related to Solar/Battery Power Solutions. The project is to validate these solutions technically and commercially by field trials with potential industry clients.                                                                                                                                                                  | 18/12/2021         | 30/05/2022       | 100,000       |
| Seonix Pty Ltd (StratifyEYE Pty Ltd)      | Novel clinical and genetic risk profiling system for glaucoma suspects.    | Seonix is commercialising university research to deliver genetic risk profiling to support faster early treatment of eye disease. This project will fund key activities to launch the genetic risk score which will identify patients at highest risk of developing glaucoma, prioritising monitoring and vision saving treatment.                                                                               | 6/12/2021          | 30/06/2023       | 304,000       |
| Splose Pty Ltd                            | Splose NDIS Practice Management Software (PMS)                             | Splose aims to be an all-in-one software solution to help NDIS Providers. The project focuses on key deliverables that NDIS Providers need such as automating service bookings and attach invoicing                                                                                                                                                                                                              | 4/12/2021          | 31/08/2022       | 100,000       |
| Optima Mining Systems Pty Ltd             | Commercial Scale Cutter Head System                                        | Optima Mining Systems is developing an innovative approach to mining with lower environmental impact and lower costs. The project will build, test, and refine a unique cutter head system to understand rock breakage production rate and wear rates.                                                                                                                                                           | 24/11/2021         | 30/06/2022       | 100,000       |
| Preserve Health Pty Ltd (Prepd Hydration) | PREPD Hydration - International Expansion to the USA                       | Completely different to any other sports drink, PREPD is a two-part hydration system which primes athletes for optimal fluid absorption using a special resistant starch in its patented formulations. The project will support International Expansion to the USA.                                                                                                                                              | 10/11/2021         | 31/05/2022       | 138,400       |
| Embarr Pty Ltd                            | Business expansion through optimising the product and installation process | Embarr is commercialising university research with a sensor system to automatically detect bushfire threats and better control home sprinkler systems in response to the threat. Funding will be used for product design, for improving the installation process, for product testing, to develop packaging, and for developing an ecommerce capability to produce a scalable product for expanded market entry. | 10/11/2021         | 30/09/2022       | 100,000       |

| Aucentra Therapeutics Pty Ltd | Phase I Clinical Trial of a Novel Targeted Cancer Therapy                                                   | Aucentra Therapeutics is an Australian Biotech company developing targeted cancer therapeutics. Aucentra is undertaking Phase I human trials in South Australia of an oral targeted cancer therapeutic with the potential to treat a range of cancers, that are resistant to traditional therapies such as chemotherapy and address a global unmet need for advanced solid tumours such as glioblastomas.      | 31/10/2021         | 30/09/2023       | 700,000       |
| Three Peaks Medical Pty Ltd   | Development, Validation and Commercialisation of an Expandable Sheath System for use in surgical procedures | Three Peaks Medical is addressing an unmet need for reduction in vascular complication rates during interventional procedures requiring large bore access to the vascular system. The project will support Three Peaks Medical to develop a vascular access sheath that allows large bore devices to be inserted into the body through a small-bore sheath, reducing complications during surgical procedures. | 30/10/2021         | 29/02/2024       | 664,018       |
| Baseline Technologies Pty Ltd | Baseline                                                                                                    | The company is commercialising its Pearler web application using AI to enable more efficient completion of lengthy cyber security questionnaires. A completed project will deliver a refined software application ready for market entry and first sales.                                                                                                                                                      | 31/08/2021         | 30/09/2022       | 100,000       |
| Sherlok Loans                 | Sherlok AI - home loan repricing and instant refinancing platform                                           | Automated tool to assist mortgage brokers in obtaining lower interest rates for their existing customers. The project will accelerate the development of the Sherlock platform developing capability which allows it to service an in-place sales pipeline.                                                                                                                                                    | 24/08/2021         | 30/09/2022       | 260,000       |

|                                           | antigen receptor (CAR) T cells.                                                                                                            | develop a repeatable and stable CAR-T cell manufacturing process, at sufficient scale, to help gain regulatory approval for a Phase 1 human clinical trial to demonstrate safety of the CAR-T cell immunotherapy.                                                                                                                                             |                    |                  |               |
| BiomeBank (Cost-Bry)                      | Rationally designed microbial therapy development for the treatment of inflammatory conditions of the gut.                                 | BiomeBank are collecting genetically and metabolically characterised bacteria for microbial therapies aiming to treat Ulcerative Colitis, estimated to affect 4 million people worldwide. The project will create a biobank of 100 individual bacterial isolates and identify candidate organisms for a better Ulcerative Colitis therapy backed by research. | 16/09/2020         | 31/07/2022       | 100,000       |
| Grow 4 Pty Ltd T/A Platform               | Platform                                                                                                                                   | Platform provide a portable device based (mobile phone/tablet) tool to deliver easily accessed precision agriculture to farmers. The project will develop the Platform precision agriculture software to the level required to support a trial and rollout agreement secured with Kubota Tractors.                                                            | 6/09/2020          | 30/09/2021       | 100,000       |
| Teamgage                                  | Conversion of architectural design to support distributed data across multiple regions and supporting international languages and formats. | Teamgage is a Software as a Service (SaaS) company which develops and sells an innovative digital platform for measuring employee engagement. The project will further develop their organisational culture survey software platform for expansion into international markets.                                                                                | 29/07/2020         | 30/09/2021       | 350,000       |
| GPN Vaccines Pty Ltd                      | Clinical trials of a serotype-independent Streptococcus pneumoniae vaccine for the prevention of pneumococcal disease.                     | GPN Vaccines is developing a lower cost vaccine against multiple strains of pneumococcal disease, which causes over 1 million deaths every year, particularly in the third world. The project will aim to complete first-in-human Phase 1 clinical trial in Adelaide to assess the safety and effectiveness of the vaccine                                    | 28/06/2020         | 31/07/2023       | 1,000,000     |
| CareApp Group Pty Ltd                     | Rapid expansion of a smartphone app that connects aged care residents with their families and care providers.                              | CareApp has developed a smartphone app to connect aged care residents with their families and care providers to achieve better wellbeing for aged care residents. The project will help accelerate technical development and customer service to rapidly meet customer demand.                                                                                | 9/06/2020          | 30/06/2021       | 250,000       |
| Ping Services (Ping Monitor Device No. 1) | Ping Monitor V2.1                                                                                                                          | Ping Services is developing the Ping Monitor, a device that uses AI and acoustic monitoring to deliver accurate and cost-effective monitoring of wind turbine blades to help prevent catastrophic failure. The project will complete the design of a                                                                                                          | 7/06/2020          | 15/01/2021       | 100,000       |

| Fusetec 3D Pty Ltd                            | Medical Training Device Collaborative Development                                                                                                                                              | Fusetec is developing 3-D printed synthetic human anatomy medical training devices for more cost effective and repeatable training for complex or rare surgery. The project will develop a comprehensive digital library of segmented human anatomies for fully operable 3-D printed synthetic human anatomy medical training devices.          | 7/06/2020          | 30/11/2021       | 500,000       |
| The Village Foundation                        | Innovative mentoring program to address perinatal wellbeing.                                                                                                                                   | The company is developing an app with a perinatal mental wellbeing pilot program to improve productivity in the workplace for mothers returning to work. The project will complete web-based training modules and on-boarding materials and roll out the pilot to agreed participating companies with onsite training and development events.   | 3/06/2020          | 30/09/2022       | 50,000        |
| First Frontier Pty Ltd, (Frontier Microscopy) | MARVIN the robotic microscope                                                                                                                                                                  | Frontier Microscopy are commercialising its automated optical technology for faster and more efficient analysis of airborne asbestos. The project will attempt to manufacture and trial prototype units in different settings with independent laboratories to improve manufacturability and reliability.                                       | 1/02/2020          | 31/03/2021       | 210,000       |
| Safe Ag Systems Pty Ltd                       | Safe Ag Systems will build additional modules, allowing them to accelerate & respond to market demand, scale commercial efforts & automate internal processes to service growth and expansion. | Safe Ag Systems provides a digital compliance and reporting solution for farmers to better manage workplace safety risks and requirements. The project will increase functionality and improve internal business processes for scaling.                                                                                                         | 1/12/2019          | 30/08/2020       | 500,000       |
| Climate Change Technologies Pty Ltd           | Commercialisation of CCT Energy Storage's Thermal Energy Device (TED), a ground- breaking alternative for industry to traditional battery storage.                                             | CCT is commercialising an innovative thermal energy storage device using phase change materials as a better alternative to conventional batteries. The project will deploy and conduct a field trial with a potential customer, audited independently to demonstrate the technology benefits and to help planning for a manufacturing facility. | 15/11/2019         | 31/01/2021       | 582,000       |
| TCPinpoint Pty Ltd                            | Mobile Application Suite                                                                                                                                                                       | TC Pinpoint are commercialising a project management software tool to save time and money for the global market for building retail tenancies. Th project will develop robust                                                                                                                                                                   | 15/10/2019         | 30/11/2021       | 100,000       |

| Org Name                                     | Project Title                                                                                                                                                          | Project Description                                                                                                                                                                                                                                                                                                      | Funding Start Date | Funding End Date | Grant Funding |
